

Carbon Reduction Plan

Supplier name: Lookers Leasing Ltd

Publication date: 05/06/2026

Commitment to Achieving Net Zero

Lookers Leasing Ltd commits to achieving net-zero Scope 1, 2, and 3 emissions by 2050.

We are in the process of developing and setting more detailed interim and long-term emission reduction targets with energy consultants, Inspired.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<p>Baseline Year:</p> <p>1st January 2021 – 31st December 2021</p>	
<p>Additional Details relating to the Baseline Emissions calculations.</p>	
<p><i>The GHG emissions scope boundary, used to establish our baseline, was determined using an operational control approach following the GHG Protocol. The baseline includes all Scope 1 and 2 emissions in accordance with SECR requirements. Scope 3 emissions have been calculated as per the Greenhouse Gas Protocol Corporate Value Chain (Scope 3) Standard Guidance.</i></p>	
<p>Baseline Year Emissions:</p>	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	10.19
Scope 2	9.83 (Location-based)
Scope 3 (Included Sources)	105.29

	<p>(Upstream transportation & distribution, waste generated in operations, business travel, and employee commuting)</p> <p>(Downstream transportation & distribution emissions have not yet been calculated, as these are expected to be minimal, but are planned for future emissions calculations.)</p>
Total Emissions	125.31

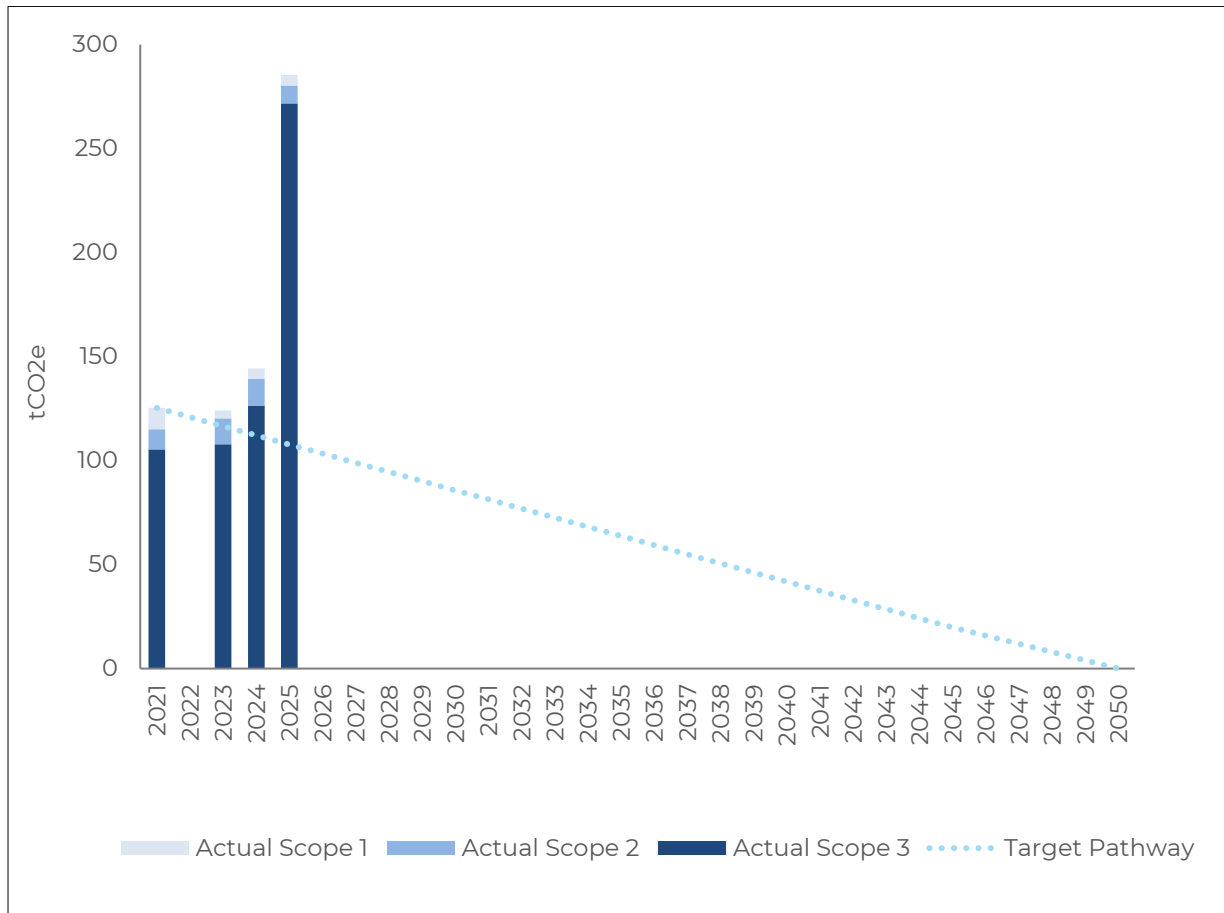

Current Emissions Reporting

<p>Reporting Year: 1st January 2025 – 31st December 2025</p>	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	5.02
Scope 2	8.70 (Location-based)
Scope 3 (Included Sources)	<p>271.68 (Upstream transportation & distribution, waste generated in operations, business travel, and employee commuting)</p> <p>(Downstream transportation & distribution emissions have not yet been calculated, as these are expected to be minimal, but are planned for future emissions calculations.)</p>
Total Emissions	285.40

Emissions Reduction Targets

Lookers Leasing Ltd aims to achieve net-zero Scope 1, 2, and 3 emissions by 2050, compared to a 2021 baseline. To achieve net-zero, we are aiming for, at least, a 90% reduction in absolute emissions compared to our base year – any residual emissions will be neutralised with permanent carbon removals, as per the Science-Based Targets Initiative’s Net-Zero Standard guidance.

Progress against our net-zero target can be seen in the graph below for 2021, 2023, 2024 and 2025 financial years*:

* 2022 financial year emissions data has not been reported in this Carbon Reduction Plan due to the unavailability of data for calculating associated emissions. Mandatory baseline year (2021) and current year (2025) emissions have been reported for the purpose of the PPN 006.

Carbon Reduction Projects

The following environmental measures and projects have been completed since the baseline or are currently underway:

- For Fleet & Transport, the transition of Lookers Leasing Ltd’s company car fleet to battery electric vehicles is progressing well along with a staff home charger scheme. Lookers Leasing Ltd is also rolling out the installation of EV charging infrastructure across its sites and planning comprehensive training in EV servicing and maintenance.
- For Energy & Estate, Lookers Leasing Ltd is continuing with the LED lighting rollout and upgrading its Building Management Systems. The “Big Switch Off” programme is set to deliver significant energy reductions, and the

organisation is exploring further solar and renewable energy installations to enhance its green credentials.

- For Waste & Environmental Controls, Lookers Leasing Ltd is maintaining its commitment to zero waste to landfill, supported by targeted tenders. Recycling and energy recovery processes are being strengthened. Water consumption monitoring and reduction initiatives are also underway.
- For Supply Chain, Lookers Leasing Ltd is embedding environmental standards into Supplier Code of Conduct, and sustainability is now integral to their procurement and due diligence processes, both of which are being addressed via upcoming tenders.
- For People & Culture, Lookers Leasing Ltd has rolled out a Carbon Literacy training programme for all staff. Internal engagement is being boosted through the “Fusebox” platform, and staff BEV awareness and training initiatives are being enhanced.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard. This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
